

Tides Rising is a Sustainability and Activation agency.

We work with companies, NGOs and communities to co-design collaborations built on sustainability. We use ESG principles to ensure a strong foundation and activate long term projects that lead to positive environmental and social impact.

Purpose:

Our purpose is to drive the path toward sustainability, ESG and ultimately positive impact to become the new business-as-usual.

What we hope to achieve:

We see a world where day to day businesses contribute positively to the planet and community they influence and function within by collaborating with key stakeholders like NGOs and other actors in the fields.

Why Tides Rising is collaborating on this Sustainable Travel offering with Alpine Sterling:

Malta is an island – and as we look around we can see that our natural beauty, our history and our human capital are a huge attraction. However we believe it's time to start safeguarding the uniqueness that is the Maltese Islands and ensuring their sustained enjoyment is done respectfully and in a way that not only gives back but also regenerates our culture and heritage to build a lasting legacy. By working with NGOs and setting up projects that infuse sustainability, we can help to ensure people travelling to Malta can enjoy our heritage for many years to come.

3 Types of Packages offered with every quote:

Sort food, prepare meals and meet local beneficiaries.

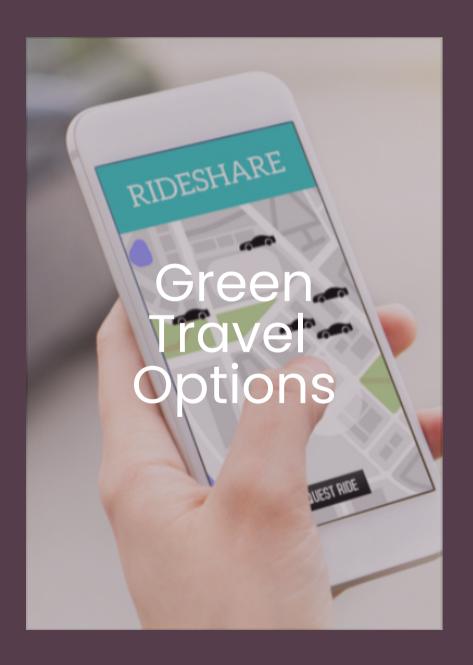

Employees vote for the activity they want to participate in and support

Reduce your Carbon Footprint with these options:

Who is Tides ~ Rising

Alex Vella Risk Manager, Consultant

Melanie Vella Sustainability & Impact Solutionist

Alex and Melanie met while running Wave of Change Malta, an NGO is dedicated to protecting and improving the biggest natural resource around our islands – the Mediterranean sea.. Using limited resources, they are driving a 20,000 strong movement across Malta, Gozo and beyond to support people to make sustainable lifestyle choices that have a positive impact on their wellbeing, the planet and our Seas. This national campaign drives local action and winning Best Social Media campaign two years in a row and implements education programmes, beach preservation programmes and other engaging activities across the Maltese Islands.

Alex is an economist by profession with 15 years experience as a financial economist in leading roles in the risk management and investment space. He is also a part-time farmer using a permaculture approach. Melanie is a lawyer who diverted her focus toward sustainability, and connecting businesses to positive social and environmental projects, working on CSR and Sustainability campaigns for over 8 years in UK and Malta. Together they are co-leading Tides Rising, a Sustainability and Activation Agency.
